

BELBROUGHTON CRICKET CLUB

ENVIRONMENTAL POLICY

Our vision is to promote, enhance & deliver sustainable high-quality cricketing programmes recognising the importance of environmental issues across the local community.

Belbroughton Cricket Club is committed to minimising any adverse impact on the environment from its activities & will in particular:

- a) Comply with all applicable environmental legislation & other specific requirements to which the Club subscribes.
- b) Prevent pollution of land, air & water from the Club's premises and its activities.
- c) Identify & manage key risks & ensure that arrangements are in place to respond to foreseeable environmental incidents and emergencies.
- d) Review the actual & potential environmental impacts of all the Club's activities, including those affecting the local community.
- e) Minimise energy consumption by improving energy efficiency in line with business needs & implementing the use of renewable energy sources wherever possible.
- f) Promote waste minimisation, re-use & recycling of waste and monitoring waste transfer arrangements to ensure safe disposal.
- g) Demonstrate our responsibility as a good neighbour by actively supporting environmental initiatives in the local community.
- h) Strive for continuous progressive improvement in environmental performance through the setting of specific objectives & targets within the Club's Development Plan. Aiming to reduce the Club's reliance on diesel powered equipment i.e. electric mowers, rollers etc, reduce reliance on grid generated electricity & to move to natural sources of water especially for ground purposes.
- i) Promote a culture of environmental awareness across the Club, involve members in environmental programmes and provide training where appropriate.
